

LETTER OF RECOMMENDATION

To whom it may concern,

Serves this letter of recommendation for **Júnior Oliveira**, who worked as **UX/UI Designer** at **BIMMS**, a company within the **CTS Group**, for a period of two years.

Throughout his time with us, Júnior was part of the team dedicated to Innovation, Digitalization, and Technology, with a primary focus on **Software Development** and **Systems Integration** within the company's core industry, Engineering and Construction sector. During this period, he consistently demonstrated a high level of professionalism, a collaborative mindset, and proactivity, combined with outstanding technical expertise.

He particularly stands out for his attention to detail and strong mastery of key design concepts, namely in the conceptualization and management of **Design Systems**. These skills enabled him to contribute significantly to the development of coherent, scalable solutions aligned with the strategic objectives of the projects.

His work was mainly focused on **Web Development** projects, particularly **SaaS** solutions, often developed using **Single-Page Application** architectures. Working within contexts related to AEC project management and integration with BIM methodologies, Júnior consistently demonstrated a remarkable ability to adapt and a deep understanding of these domains, actively contributing to a product-oriented approach and the continuous improvement of proposed solutions.

To note that the termination of his role at BIMMS is the result of a structural review of positions within the team and the broader Business Unit, and in no way reflects his performance or professional value, both of which were consistently of a high standard.

Given his technical and personal qualities, BIMMS confidently recommends Júnior Oliveira for any professional challenges in the field of UX/UI Design or related areas.

For any further information or verification of the competencies described above, Eng. João Ribeiro, Technical Coordinator and Supervisor of the **Software Development & Systems Integration** Business Unit at BIMMS, is available to provide confirmation.

João Ribeiro

Business Unit Lead

System Integration & Software Development
